

EDSB Are Recruiting!

Apprentice Installation Fire & Security Engineer

Overview

The EDSB Group of Companies are national providers of Fire & Security, Electrical, Mechanical and Building Services. From Design and Specification through to Installation and Maintenance, our focus is to deliver compliance, alongside an unbeatable level of service.

We work nationally across the UK and we pride ourselves on being a flexible, client focused organisation responding quickly and efficiently to our clients' needs. Our aim is to work closely with our valued clients to ensure our service delivery is exceptional at all times.

Role Description

We are now looking to employ a number of Fire & Security Installation Apprentices to work across a number of sites in the South of England.

As an apprentice you will complete a three year work based learning apprenticeship with Skills for Security, by attending college and working with a qualified engineer. You will assist in the installation of a range of fire and security products (CCTV Systems, Access Control, Fire Systems, Intruder Alarms)

This role will include but not limited to the items below :

- Installing, testing and maintaining different systems – including a range of fire, emergency and security systems
- Learning about electrical and electronic principles – including codes of practice, commissioning, design criteria and installation, testing and maintenance techniques
- Learning about system technologies
- Demonstrating good knowledge of health and safety practices, regulations and legislation within fire, emergency and security environments
- Demonstrating good communication styles and communicating in a clear, articulate and professional manner

- Punctual and accurate completion of timesheets on a monthly basis

Off the job training provided by Skills for Security:

Level 3 Fire Emergency and Security Systems Advanced

- Functional Skills Maths and English (if required)
- Remote and in house (COVID dependent) training on fire & security systems
- You will experience real world problem solving and installing a variety of systems that will give you the skill set to become a qualified installer.

As well as qualifications gained through the apprenticeship, we will look at additional industry related courses and qualifications to assist with your learning and skill set. These may range from IPAF qualifications to gaining a ECS Card

Required Skills

- Enthusiasm to learn and an interest in problem solving
- Reliability and ability to use initiative
- Good communication skills
- Good IT skills as our larger projects require the use of computers and networks
- Ability to work both independently and as a team player
- Strong work ethic
- Full driving licence
- Willingness to go the extra mile
- Excellent timekeeping and time management skills
- Self motivated and a team player, demonstrating professionalism, positivity and proactiveness
- Willingness to travel and stay away for jobs where necessary

Working hours are 08:30 to 17:00 with a 30 minute lunch break. Salary will be discussed at interview stage.

Please register your interest by sending your CV, a covering letter and details of your current salary to edsbcareers@edsb.co.uk
