

EDSB CELEBRATES 15 YEARS PROVIDING COMPLIANCE SOLUTIONS

Since 2008 EDSB has gone from 6 to **152** team members and from 2 to **82** national engineers, however, our 'First Time Fix' rate has always remained above **94%!**

We may have become bigger but our standards have always remained high! Don't just take our word for it, see what our clients think...

“ EDSB have provided an excellent service to our organisation. It has transformed how we manage our clients' water compliance services.

Dean came in to see us and promised quite high standards to which there were a few raised eyebrows, however I can honestly say everything that was promised is now being delivered.

EDSB cover the whole of the country for us, to multiple clients with multiple sites, but the beauty of their system is that it's all presented in one easy-to-use portal. The portal is the place where all documents, live temp monitoring and any alerts are easy to access and download at will for any building.

The live temperature monitoring service is the new standard in water compliance, no longer do we need a man in a van to record the temperatures and prove flushing. It reduces carbon footprint, reduces costs, and above all gives you real time and historical temperatures at any outlet chosen.

Switching to EDSB has been trouble free and the level of service is far greater than our previous provider. ”

“ I just wanted to share a quick note and let you know that you guys have done a good job in water hygiene and fire alarm system Issues. You guys have been very responsive and taking action quickly. I am glad that I decided to get you on-board. ”

“ EDSB have continued to support us by ensuring our sites are kept compliant. I've always been happy with their attention to detail, customer service & general management of our account. ”

“ EDSB can work with your business no matter what Fire & Security package you have. Their team of highly qualified Surveyors and Engineers are extremely knowledgeable. ”

“ The EDSB Group of Companies have worked incredibly hard to upgrade the Fire Detection System across the Stadium, ensuring that we are fully compliant. They have been a pleasure to work with and their professional approach has provided confidence in their ability within Fire & Security disciplines. ”

On behalf of EDSB, may we thank our loyal client base for their ongoing business as well as the amazing partnerships we have forged over the past 15 years.
