

MAKING RECYCLING COUNT AT EDSB

Recycling Right: Turning Waste into a Greener Future

EDSB is continuing our Carbon Reduction Journey and we are proud to bring the **'Recycle'** principle of the 5R's to life with our latest initiatives. Our colleagues are already doing a great job but there is always room to improve. By strengthening how we sort, collect and recycle materials across the company, we are reducing landfill waste and lowering our carbon footprint.

How EDSB is improving recycling:

- Introducing clearer bin signage
- Separating recyclable materials more effectively
- Using recycled paper in the office
- Promoting recycling awareness among our colleagues

Together, small everyday actions add up to meaningful change, helping us move towards a more sustainable future.

John Koranteng, **EDSB's Stores Waste Manager**, explains why this change is so important:

"My role is to make sure our waste is managed as efficiently as possible. Improving recycling across EDSB helps us cut waste, reduce carbon and make better use of the resources we already have."

Have an idea to contribute to the 5R's? Feel free to reach out to edsbstores@edsb.co.uk - we are always ready to turn great ideas into action!
